

TP PUNCHING MACHINE

Comfort and precision with reduced size.

Semi-automatic punching machine for finger cutting of PVC and PU belts.

Its structure and detachable head make it easy to transport and allows the **die-cutting of wider belts** thanks to the opening of its ends.

It performs **die-cutting of up to 3 layers** in stepped splices, without the need to manipulate the belt.

Precise results thanks to the clamping bar that avoids any unwanted movement during the cutting process.

Quickly and conveniently **interchangeable cutting boards**.
