

# PAMFE

Press for vulcanizing profiles on rubber bands.

Designed for hot vulcanizing profiles on rubber belts, optimizing working times thanks to its capacity to operate with up to **four totally autonomous elements**. It provides temperature, pressure and cooling independently between the top and bottom frames.

The **arrangement of each element is fast and convenient**, and can be blocked to avoid undesired movements when positioning the belt.

With **interchangeable moulds**, a wide range of jobs may be performed, obtaining a reliable and durable result thanks to hot vulcanizing in the most agile and safe way.

For further information & technical data, visit [www.fonmar.com](http://www.fonmar.com)

## MAIN FEATURES:

- Adjustable distance between elements.
- Hydraulic cylinder pressure up to 7 Bar.
- Easy and comfortable displacement.
- Interchangeable moulds.
- Independent top and bottom temperatures.
- Belt width up to 1600mm.

Totally autonomous elements.

Easy and comfortable displacement.

Interchangeable moulds.

Pressure through hydraulic pistons.
