

TROQUELADORA TM

The best accessory for your on-site jobs.

Manual punching machine for finger cutting on PVC and PU belts.

Its structure, **reduced weight and detachable head** facilitate transport to prepare the belt outside the workshop.

Open ends allow the die-cutting of wider belts.

Die-cutting of up to 2 layers in stepped splices, without the need to manipulate the belt.

Precise results thanks to the clamping bar that avoids any unwanted movement during the cutting process.

Quickly and conveniently **interchangeable cutting boards**.
