

GAMMA

All-in-one, the ultimate solution for on-site jobs:
comfortable, fast and easy to program.

Press with **all-in-one design**, without the need for external control unit.

Manufactured with light and resistant materials, it is perfect for working on-site.

Its controllers allow the programming of a **stepped temperature**, generating two heating levels for **optimum results** even in thicker belt splices.

Air cooling makes it possible to work in places where the use of water is impossible or restricted.

Wi-Control presses can be programmed, process monitored and reports generated via mobile phone.
